## EXPERIENCE

### Cognifyz Technologies – Front-End Developer Intern

Remote, May – Jun 2024

- Developed and styled frontend pages with HTML, CSS, JavaScript; optimized responsiveness.
- Collaborated using GitHub and resolved UI/UX issues raised during development sprints.

### Deloitte (Forage) – Data Analytics Virtual Intern

Remote, Jul 2025

- Performed data wrangling, visualization, and fraud detection on mock financial data.
- Generated actionable insights using Excel tools and presented audit findings.

### Freelance Content Creation – Video Editor | Designer | YouTuber

Remote, 2020 – Present

- Delivered 20+ branding videos and posters for student startups and campus events.
- Manage academic YouTube channel with 1350+ subscribers and 43K+ views, focusing on eBooks.

## PROJECTS

### Bento – Tiffin Delivery App

Jan – Jun 2025

Designed and deployed a MERN stack web app for college student meal delivery.

- Built order dashboard, payment integration (Stripe), and map-based tracking.
- Implemented role-based vendor panels with analytics for students and admins.

### FrameX – Photography Portfolio

Sep 2024

Developed and hosted personal portfolio site showcasing creative photography work.

- Used image compression and lazy loading to optimize performance across devices.
- Designed brand-consistent layout using modern CSS animations and transitions.

### Card Clash – Memory Card Game

Jul 2024

Built an interactive card-matching game using JavaScript, HTML, and CSS.

- Implemented score tracking, card shuffle logic, and smooth transitions for an engaging experience.
- Responsive for mobile and desktop screens using flexible grid layout.
